

## ABS 3.0 filaments Description:

ABS material is probably the most common material to work with for 3D printer. It is compatible with Mendel, Darwin, MakerBot, RapMan, and other 3D printers. ABS has good thermo tolerance, hardness etc. advantage.

Our ABS 3.0 filaments also have following advantages:

- (1) High precision dimension with  $2.96\pm 0.05\text{mm}$  range which make material supply easily and with high print quality;
- (2) Good roundness with  $2.96\pm 0.04\text{mm}$  range which make material supply easily and with high print quality;
- (3) Order flexibility and short lead time;
- (4) Competitive price

The spool dimension is 16\*16\*9 cm, was sealed plastic bag with desiccants.

The product specifications are listed below:

POLYMER PROPERTIES	Description
Material	ABS
Color	White/Red/Yellow etc.
Filament diameter	$2.96\pm 0.05\text{mm}$
Roundness	$2.96\pm 0.04\text{mm}$
Print temperature	220 - 260°C
Spool capacity	1.0kg
